OBJECTIVE
ACGME Competency Domain:
Patient Care

By the end of this course, learners will be able to:

Formulate a differential diagnosis for the patient.

OBJECTIVE
ACGME Competency Domain:
Patient Care

By the end of this course, learners will be able to:

Ask all patients > 65 years old, or their caregivers, about falls in the last year, watch the patient rise from a chair and walk (or transfer), then record and interpret the findings.
OBJECTIVE
ACGME Competency Domain: Patient Care

By the end of this course, learners will be able to:

Assess and provide initial management of pain and key non-pain symptoms based on patient's goals of care.

OBJECTIVE
ACGME Competency Domain: Patient Care

By the end of this course, learners will be able to:

Identify non-operative and operative treatment options available for common musculoskeletal disorders.
OBJECTIVE
ACGME Competency Domain: Patient Care

By the end of this course, learners will be able to:

Perform routine pelvic exam.

OBJECTIVE
ACGME Competency Domain: Medical Knowledge

By the end of this course, learners will be able to:

Identify concepts and procedures involved in the evaluation and management of male infertility, sexual function/dysfunction, and andrology.
OBJECTIVE
ACGME Competency Domain: Medical Knowledge

By the end of this course, learners will be able to:

Define stigma and describe the destructive impact it has on a patient’s life.

OBJECTIVE
ACGME Competency Domain: Medical Knowledge

By the end of this course, learners will be able to:

Describe the relationship of the clavipectoral fascia to the Pectoralis Minor Muscle, the Costocoracoid Membrane, the Cephalic Vein, and Subclavious muscle.
OBJECTIVE
ACGME Competency Domain: Medical Knowledge

By the end of this course, learners will be able to:

Explain the chemical composition of DNA and RNA.

OBJECTIVE
ACGME Competency Domain: Medical Knowledge

By the end of this course, learners will be able to:

Describe at least four metabolic changes that occur in short-term and long-term starvation.
OBJECTIVE
ACGME Competency Domain: Medical Knowledge

By the end of this course, learners will be able to:

List the factors that affect oxygen delivery and consumption.

OBJECTIVE
ACGME Competency Domain: Practice-Based Learning and Improvement

By the end of this course, learners will be able to:

Access, appraise, and apply relevant texts and evidence-based literature.
OBJECTIVE
ACGME Competency Domain:
Practice-Based Learning and Improvement

By the end of this course, learners will be able to:

Self-assess competency and design and implement appropriate learning plan.

OBJECTIVE
ACGME Competency Domain:
Practice-Based Learning and Improvement

By the end of this course, learners will be able to:

Demonstrate own ability to educate others such as faculty, staff, residents, and students by using own patients as illustrative examples.
OBJECTIVE
ACGME Competency Domain: Interpersonal and Communication Skills

By the end of this course, learners will be able to:

Document a patient's complete medication list, including prescribed, herbal and over-the-counter medications, and for each medication provide the dose, frequency, indication, benefit, side effects, and an assessment of adherence.

OBJECTIVE
ACGME Competency Domain: Interpersonal and Communication Skills

By the end of this course, learners will be able to:

Present palliative care (including hospice) as a positive, active treatment option for a patient with advanced disease.
OBJECTIVE

ACGME Competency Domain: Interpersonal and Communication Skills

By the end of this course, learners will be able to:

Communicate the key components of a safe discharge plan (e.g., accurate medication list, plan for follow-up), including comparing/contrasting potential sites for discharge.

OBJECTIVE

ACGME Competency Domain: Interpersonal and Communication Skills

By the end of this course, learners will be able to:

Describe the importance of cultural attitudes and customs in doctor-patient interactions and in interactions with teachers and colleagues.
OBJECTIVE

ACGME Competency Domain: Interpersonal and Communication Skills

By the end of this course, learners will be able to:

Describe the special considerations in interviewing children, adolescents, older adults, and hospitalized patients.

OBJECTIVE

ACGME Competency Domain: Interpersonal and Communication Skills

By the end of this course, learners will be able to:

Write concise clinical encounter notes in appropriate format.
OBJECTIVE

ACGME Competency Domain: Professionalism

*By the end of this course, learners will be able to:*

Demonstrate a strong work ethic, and consistently and dependably carry out one’s duties with honesty, personal integrity, self-motivation, and self-discipline.

OBJECTIVE

ACGME Competency Domain: Professionalism

*By the end of this course, learners will be able to:*

State the impact of disciplinary actions, patient complaints, nursing incident reports on resident’s future from perspective of medical directors, licensing boards & group practice.
OBJECTIVE

ACGME Competency Domain: Professionalism

By the end of this course, learners will be able to:

Use resources available when ethical or professional behavior problems arise.

OBJECTIVE

ACGME Competency Domain: Professionalism

By the end of this course, learners will be able to:

Care for patients in a compassionate way, consistently demonstrating respect for the privacy and dignity of all patients.
OBJECTIVE

ACGME Competency Domain: Professionalism

*By the end of this course, learners will be able to:*

Identify and name professional and unprofessional behaviors in self and others using established nomenclature (e.g., altruism, respect, autonomy, integrity, accountability).

OBJECTIVE

ACGME Competency Domain: Systems-Based Practice

*By the end of this course, learners will be able to:*

Identify barriers to access to health care.
OBJECTIVE

ACGME Competency Domain: Systems-Based Practice

By the end of this course, learners will be able to:

Identify the common sources of medical errors and outline steps to avoid or minimize them.

OBJECTIVE

ACGME Competency Domain: Systems-Based Practice

By the end of this course, learners will be able to:

Discuss the need for cost-benefit analysis of workup and treatment options, and participate in the development of a cost-effective patient management plan.
OBJECTIVE

ACGME Competency Domain: Systems-Based Practice

By the end of this course, learners will be able to:

Use institutional resources including social services, home health care, outpatient services, etc., for efficient and effective patient-oriented discharge planning.

---

OBJECTIVE

ACGME Competency Domain: Systems-Based Practice

By the end of this course, learners will be able to:

Adhere to patient safety guidelines for care transitions (e.g., handoffs) using a standard model (e.g., SBAR).
OBJECTIVE

ACGME Competency Domain: Systems-Based Practice

By the end of this course, learners will be able to:

Access and effectively utilize the patient’s EHR to effectively manage, coordinate, and communicate regarding care of the patient.

OBJECTIVE

ACGME Competency Domain: Patient Care

By the end of this course, learners will be able to:

Conduct a surveillance examination of areas of the skin at high risk for pressure ulcers and describe existing ulcers.
