Design Machine Group
Department of Architecture  College of Architecture and Urban Planning  University of Washington

Design Machine Group is a computing research group focusing on Design, Computing and the built environment. Visit the DMG website at http://depts.washington.edu/dmachine

Ben Benjamin is an artist and graphic designer living in San Francisco. His best-known work is Superbad.com—one of the first websites created with no other purpose than being art. Superbad has won a handful of awards and was included in the Whitney Museum of American Art's 2000 Biennial.

Ben will talk about design, and specifically about Superbad.com, background, concept, and his experiences with the project.

Benjamin will conduct a small Interaction Design Workshop for a limited number of participants. If you are interested in participating in the workshop, please sign up in advance at the DMG website: http://depts.washington.edu/dmachine/lecture/signup and indicate your related background and experience.
