The Department of Pathology invites applicants with an M.D. or Ph.D. degree to apply for two (2) research positions in the area of proteomics. The applicant should have broad experience in proteomics research and have familiarity with the latest approaches to proteomics. The applicant should have experience in developing and evaluating new biomarkers and the translation of their discoveries into novel clinical applications. A history of funded research is required and the applicant will be expected to be active in the Department’s teaching programs. Academic appointment and salary will be commensurate with experience.

The University of Maryland School of Medicine is the first public and fifth oldest medical school in the United States. The School of Medicine was the founding school of the University of Maryland and today it is an integral part of the 11-campus University of Maryland System. On the University of Maryland at Baltimore campus, the School of Medicine serves as the foundation for a large academic health center that combines medical education, biomedical research, patient care and community service. The School of Medicine ranks in the top tier of medical schools and is ranked 8th in research funding at public medical schools. In 2004, external research funding exceeded $280 million.

Please forward curriculum vitae, a brief statement of recent interests, and the names of three references to:
