

Group D Priorities

1. Basic/applied research needs that should be addressed by AMTAS
2. Educational/training courses that should be developed by AMTAS
3. Long-term growth of AMTAS (new funding/members)

1. Research needs

- Bonding material treatments (peel ply)
- Environmental durability
- NDI to assess weak bonds
- Robust temporary repair techniques in remote environments
- Thermoplastics—characterization

2. Training

- Incorporate distance learning with lab activity
- Traveling road show
- Multi-language at the working level
- Connect training to “quality”—certification to be made part of quality procedures
- Organization (required)

3. AMTAS growth

- Participants:
 - other OEMs (lack of communication; must see value)
 - tier 1
 - raw material
- Ideas:
 - business plan for AMTAS
 - invite outside interests (e.g., insurance)
 - meeting location—JAMSCOE collaboration
 - revise ITAR (?)
 - expand AMTAS to include JAA/CAA
