“Treating Pain Based on the Underlying Mechanisms: Are We There Yet?”

Daniel J. Clauw, M.D.
Professor of Anesthesiology, Medicine and Psychiatry
Director, Chronic Pain & Fatigue Research Center
University of Michigan

Tuesday, May 24, 2016
5:00pm—6:00pm
Health Sciences Building,
Room T-747

Learning Objectives:
Upon completion of this presentation, attendees should be able to:
1. Identify the underlying mechanism responsible for chronic pain
2. Identify the most effective pharmacological treatments for pain based on mechanisms
3. Determine the optimal manner to incorporate non-pharmacological treatment of pain
