“7 Amazing Pain Facts That Could Change Your Life”

Lorimer Mosley, DSc, PhD, FACP
Professor of Clinical Neuroscience, Foundation Chair in Physiotherapy, Chair, PainAdelaide; School of Health Sciences, University of South Australia

Thursday, May 10
5:30pm—6:30pm
Hogness Auditorium
Room A-420

Learning Objectives:
Upon completion of this presentation, attendees should be able to:
1. Understand the difference between nociception, pain and pain-related disability.
2. Appreciate the complexity of tissue-based danger detection.
3. Understand contemporary theory on brain function and its relevance to the biopsychosocial model.
4. Appreciate the concept of ‘bioplasticity’ as it relates to the development, prevention and treatment of persistent pain.
5. Understand contemporary approaches to pain education including principles of conceptual change.
6. Understand the role and evidence for contemporary educational strategies and content in pain management.
