Elective courses should be preapproved by the program director

Open to Graduate Students in Related Programs by Permission

E = Elective – Note: Electives on this list mean that they are pre-approved but please confirm with the program director. Be sure to check the time schedule for availability as these courses may not be offered every year. You are free to choose other electives for courses anywhere on the UW campus but you must discuss these with your advisor and program director to obtain approval. The goal of the electives is to supplement the core curriculum in an area of interest to you that also should support the work of your master's project.
