FEATURING
MARCUS BUGGERT, PHD
Assistant Professor, Docent
Center for Infectious Medicine (CIM)
Karolinska Institutet

Marcus Buggert defended his PhD Thesis in 2014 at the Dept of Laboratory Medicine, Karolinska Institutet, Sweden on the role of T cells in natural control of HIV infection. Joined Dr. Michael Betts’ laboratory at University of Pennsylvania (Upenn) in 2014 for post-doctoral studies. Since 2018, he joined the Center for Infection Medicine, Karolinska Institutet the same year as an Assistant Professor. His group focuses their work on studies of human circulating and resident memory T cells in the context of health and viral disease - including HIV and COVID-19.
