The workshop will use real and hypothetical cases to identify and address ethical issues that arise in eHealth research and practice. Facilitators from the UW Departments of Global Health, Epidemiology, and Bioethics and Humanities and from the Institutional Review Board will present cases, guide discussions, and address questions. Participants are encouraged to bring examples from their own work and to ask questions about issues that they have encountered.

Please register here for this workshop.

For more information on this, and other workshops and events, please visit the CFAR eHealth Scientific Working Group page.
