

DIABETES AND METABOLISM SEMINAR SERIES

Cystic Fibrosis/Diabetes Workshop

Wednesday January 13, 2021

8:25 am – 11 am (via Zoom)

Registration <https://redcap.link/v0ij4xrp>

8:25am Opening Remarks

8:30am **Cystic Fibrosis-Related Diabetes: Clinical Management**

Farah Khan, MD

*Clinical Assistant Professor,
Metabolism, Endocrinology and Nutrition*

9:10am **Mechanisms Underlying Islet Failure in Cystic Fibrosis**

Rebecca Hull, PhD

*Research Professor,
Metabolism, Endocrinology and Nutrition*

9:50am Break

10:00am Keynote Lecture:

Growth and Bone Health in Cystic Fibrosis

Michael Stalvey, MD

*Associate Professor
Associate Director for Research Affairs
Division of Pediatric Endocrinology & Diabetes
University of Alabama School of Medicine*

Dr. Stalvey's research focuses on the pathogenic mechanisms and endocrine manifestations of cystic fibrosis (CF), with particular emphasis on understanding the contributions of CFTR to growth and bone health/metabolism, and the pathogenesis of CF-related diabetes (CFRD).

Event Jointly Sponsored by UW Cystic Fibrosis Research Translation Center
