Hui Ching Sun, Patient Services Coordinator

Location and Parking

Hall Health Primary Care Center is located on the UW main campus, directly northeast of the Student/Husky Union Building (HUB), and between Padelford Hall and the University of Washington Club.

Upon entering the UW campus, stop at the kiosk/gate to pay for parking and request a map and directions to our location. If you are handicapped or disabled, please provide this information to the attendant so an appropriate parking area is made available.

If you are parking in lots N18-N21 (behind Padelford Hall), use the escalators directly west of the parking area. After the escalators, continue straight ahead on the path and up the stairs. At the top of the stairs, turn left -- we are the second building on your left.

Please arrive 20 minutes before your scheduled appointment and check in at the Patient Service Center upon entering the building. A welcome packet of information will be in the waiting area for patients to review and includes forms to complete.

HALL HEALTH PRIMARY CARE CENTER

<http://hallhealth.washington.edu>

UW Travel Clinic at Hall Health Primary Care Center

Hall Health Travel Clinic is internationally recognized. This valuable resource is now available to the general public as well as students. Our expertise in medical care for travelers helps them plan a healthy trip to any destination. We offer pre-travel counseling, immunizations, and health advice for adults and children traveling outside of North America. Our clinic is a Washington State Department of Health-designated center for yellow fever vaccine. We also offer post-travel health screening, plus full care and treatment of illnesses.

Pre-travel consultations are available by appointment. To better serve your needs, you will be asked to complete a questionnaire regarding travel plans, and to bring in a complete list of all your previous immunizations.

Because several weeks may be required to complete a needed vaccine series, we recommend the initial appointment be held at least 6 weeks before departure. Please telephone for an appointment two weeks before that. When this is not possible, we will strive to meet your travel health needs as completely as time permits.

The consultation includes:

- Country-by-country analysis of your itinerary, anticipated activities, and review of previous immunizations to develop an individualized plan.
- Advice on malaria prophylaxis and needed prescriptions.
- Information and prescriptions for medications

to help prevent or treat illnesses while traveling. The Pharmacy at Hall Health is available for filling travel medicine prescriptions.

- Written materials and general health hints for travelers on topics such as diarrhea, rabies, and other diseases.
- International Certificate of Vaccination as approved by the World Health Organization.
- Administration of your planned vaccines on the day of your consultation or as scheduled.
- A pleasant and caring environment that promotes patient confidence.

The consultation fee does not include:

- *Immunizations*
- *Injection fees*
- *Lab tests*
- *Medications*
- *Post-travel illness screening*

Available Immunizations

- Hepatitis B
- HPV (Human Papilloma Vaccine)
- Influenza
- Japanese Encephalitis
- Measles–Mumps–Rubella
- Meningococcal meningitis
- Pneumococcal pneumonia
- Polio
- Rabies
- Skin test for Tuberculosis

- Tetanus–Diphtheria–Pertussis
- Twinrix (Hep A&B combined)
- Typhoid Fever
- Varicella Hepatitis A
- Yellow Fever
- Zostavax (shingles)

Available Lab Tests

Antibody level blood tests, also known as titers, are available. These measure immunity against certain vaccine preventable diseases.

Payment, Billing, and Insurance

Please contact your insurance company to verify travel medicine coverage. Billing may be arranged. Otherwise, payment is due the day of your appointment. We accept cash, check, Visa or MasterCard.

Post-travel Medical Care

Despite the best planning and preventative measures, accidents and illnesses can occur while traveling. Hall Health Primary Care Center offers excellent post-travel medical care. Call for an appointment upon your return if you experience any illness during your trip or shortly thereafter.

Travel Health Presentations

A travel health presentation, given by one of our healthcare professionals, may be arranged for your organization by calling (206) 685-1186.
