

## Exam Analysis

For each question you missed on this exam, identify the reason that best describes why you missed the question and put a check mark next to that reason. When you are done, you will have a tally of the reasons you made errors on this exam. Hopefully you will identify a pattern that will help you on future tests.

1. I misread the question.
2. I misread the choices (answer selection)
3. I had trouble interpreting the question and should have asked for clarification.
4. I didn't consider the combination answer(s) (all the above, a and b etc.)
5. I wasn't confident so I changed the right answer to the wrong answer
6. I didn't study enough
  - a. I didn't review this information because I didn't think it was important
  - b. I didn't look at the diagrams from the notes and text that the instructor presented on the screen.
  - c. I didn't review the slides/laboratory exercises we did in class.
  - d. I didn't read/review the article/handouts provided by the instructor.
  - e. I never understood the material covered in this question and didn't get help
7. I marked the wrong box on the scantron (transfer error)
8. I left the scantron blank (didn't answer)
9. Other (please describe)

Improvement plan:
