

Last Question on Final Exam:

1. [4 pts] While you have done a formal “study” of the design process, it is very likely that you learned more about this process through “experience” as you designed, built, and tested your prototype of the “Land Based Transportation using Recycled Plastics.” DESCRIBE at least one (1) thing that you learned about the team experience and (1) thing you learned about the design process in general, especially as compared to the “text book discussion” of the process.
