Last Updated
12 March 2012

This course explores the ways in which environmental health problems are controlled in the United States. That is, we will examine both the policies and practices of Environmental Health as it is practiced in the real world. The class will look at the ways that various government programs are established, organized and operated to prevent or control hazards in the community. It also examines the legal and regulatory framework that has been established to prevent or control environmental health risks.

Meeting Times and Locations:

10:30 - 11:20 a.m.
Monday, Wednesday, Friday -- Room RR-134, Health Sciences Center

Instructor:

<p>Charles D. (Chuck) Treser, MPH, DAAS Office: E-179A Health Sciences Center Office Hours: 10:30 - 11:30 a.m. and 1:30 - 3:30 p.m. Daily Email: ctreser@u.washington.edu Telephone: 206-616-2097</p>
--

Announcements:

03/18/12 :: Class Listserv: A course listserv is available to send messages to all students enrolled in the course. This list is maintained by the Registrar's Office and is updated every night. The listserv is used to send announcements to the students in ENVH 473, and is available to any student who would like to send a message to the rest of the class. Email messages should be addressed to: envh473a_sp12@u.washington.edu.

Next DEOHS Seminar:

Thursday, 29 March :: TBA
Speaker: Robert Duff, MS -Washington State Dept. of Ecology
Time: 12:30 - 1:20 p.m.
Location: T-435 Health Sciences Center

In the News . . .

See what's happening around the world at the interface of the environment and human health. This site is updated frequently with articles from the Environmental News Network, Associated Press and other sources of news and events highlighting and exploring the link between environmental factors and conditions and human health. [Click here to go to the site.](#)

Welcome to ENV H 473. The course syllabus, schedule of class sessions, reading assignments and other course materials can be found on the course website.

<http://courses.washington.edu/envh473/>

You are responsible for reading and following the syllabus. All reading assignments (except day 1) should be completed before coming to class.

This site, and especially the course schedule, is updated frequently and you should check it routinely so that you are aware of any changes.

Best wishes
Chuck Treser
