

FLYNN MCGUIRE

Targeted Rural Underserved Track

WWAMI
TRUST
UW MEDICINE

Idaho

Entering Class of 2018

TRUST seeks to provide a continuous connection between rural, small city underserved communities, medical education, and health professionals in our region. Our goal is to create a full-circle pipeline by guiding qualified students through a special curriculum that connects continuity communities in WWAMI to the University of Washington School of Medicine and its network of affiliated residency programs in an effort to help meet the workforce needs of the region.

Sandpoint!

I was lucky to grow up in Park City, Utah where I developed a deep affection for the outdoors and the communities that the integrally related to them. I am exceedingly excited to learn, work, and live in a place like Sandpoint which is a model for the type of place I hope to practice medicine in the future.

I attended Colorado College where I received a Bachelors of Arts in Neuroscience. After working as an Autotransfusionist in a critical access hospital in Northern Utah for two years I participated in graduate studies at Colorado State University where I obtained a Masters of Biomedical Science with a concentration in Human Anatomy and Physiology. Since graduating I've been living in Idaho with my wife Katherine and worked as a Electronic Health Records consultant and as a Medical Scribe in the Emergency Department.

My wife Katherine and I are avid skiers and also enjoy biking and climbing. Our dog Albert is an avid eater. We are expecting our first child in August.

I look forward to my time in Sandpoint, to meeting Dr. Meulenberg, Dr. Dunn, and to the rest of the community.

Sincerely, Flynn McGuire
