

This one-year fellowship offers our trainees the opportunity to work with a vibrant and diverse team of health care providers, manage common and complex injuries in the office and on the playing field, gain expertise in musculoskeletal ultrasound, and receive mentorship in completing a scholarly project with leading researchers in the field. Each fellow assumes the role of head team physician at a local high school, serves as medical co-director for the Seattle Marathon, and plays an integral role on the medical team providing care to varsity student-athletes at the collegiate level, including the University of Washington.

The University of Washington participates in the NRMP Primary Care Sports Medicine Matching Program.

The University of Washington considers applicants with training in family medicine, internal medicine, and pediatrics, offering two fellowship tracks (one in FM/IM and one in Pediatrics).

Minimum Screening Requirements

Applications will only be considered for interviews after their ERAS application, personal statement and three letters of recommendation have been received.

Special Instructions

The following list of items is expected to be included as part of your application:

- Completed ERAS Application
- 3 letters of recommendation (1 from your residency's program director)

Established in 1996, the University of Washington Primary Care Sports Medicine Fellowship is an ACGME - accredited program, which provides comprehensive training and experience in primary care sports medicine. It is sponsored jointly by the UW Department of Family Medicine, Seattle Children's, and UW Medicine.

Strengths of the program include twelve core primary care faculty members with certificates of added qualification in sports medicine, a world class academic medical center, top-ranked Family Medicine and Pediatrics Departments, a strong research emphasis and preparation, and a top-tier NCAA Division I sports program. The primary care sport medicine team is responsible for management of all sports-related injuries and illnesses for the University of Washington Huskies, and the Seattle Seahawks. Core faculty include Dr. Kimberly Harmon, Dr. Jonathan Drezner, Dr. John O'Kane, Dr. Hank Pelto, Dr. David Siebert (Associate Director), Dr. Ashley Austin, Dr. Celeste Quitiquit, Dr. Tom Jinguji, Dr. John Lockhart, Dr. Monique Burton, Dr. Kyle Nagle (Associate Director), and Dr. Ashwin Rao (Program Director).
