Happy Spring!

Thank you for all the hard work you have done to mentor Underserved Pathway (UP) students and to prepare the graduating class of 2019.

Please save the date for the UW School of Medicine All Pathways graduation.

**WHEN:** Thursday, May 23 from 3-5 pm

**WHERE:** Vista Café, Foege Hall, 3720 15th Ave NE, Seattle, WA 98195

**More Details:** Genya Shimkin ([upath@uw.edu](mailto:upath@uw.edu)) will send an email with more details.

As a reminder: the purpose of this memo is to help guide your quarterly discussions with your UP students.

Thank you again for taking time to be a mentor for our Underserved Pathway students! Please let us know if you have any questions or concerns.

Special congratulations to Garrett Strizich who was selected for one of the Husky 100 awards and to Tessa Moore for the Future of Rural Medicine Award. If you know of other students that should be highlighted for certain awards or recognition, please let us know. We know the students are doing great things and want to highlight them!

SPRING: Checking in with your UP mentee

Mentoring First Year Medical Students (MS1), now known as Foundations Phase students

Things to talk about with your UP students:

- Year end summary - how was their first year of medical school? Do they feel prepared for the summer? What did they value most in their Primary Care Preceptorship (PCP) and the first four blocks?
- Concerns about the summer or the remaining blocks of the Foundations Phase?
- Demands on time and intellect.
- What is your student doing this summer?
  - Global Health Immersion Program (GHIP) or Rural Underserved Opportunities Program (RUOP)?
  - Research? Something else?
- Schedule a time to see or talk to your mentee over the summer.
- MS1 Spring Curriculum (Year 1 Spring has a drop down): [http://www.uwmedicine.org/education/md-program/current-students/curriculum/phase-1-foundations](http://www.uwmedicine.org/education/md-program/current-students/curriculum/phase-1-foundations)

Discuss student’s summer plans. The [Rural Underserved Opportunities Program (RUOP)](http://www.uwmedicine.org/education/md-program/current-students/curriculum/phase-1-foundations) and the [Global Health Immersion Program (GHIP)](http://www.uwmedicine.org/education/md-program/current-students/curriculum/phase-1-foundations) each offer a chance to live in a rural, underserved, or international community for a month or more during the summer. All students must complete a scholarly project to graduate and the UP requires a Scholarly Project focused on the underserved. Most students complete an [Independent Investigative Inquiry (III)](http://www.uwmedicine.org/education/md-program/current-students/curriculum/phase-1-foundations) project during RUOP or GHIP which automatically qualifies for UP credit. If your student is not completing the III as a part of RUOP or GHIP, they will do an alternative project and some students have completed a project with their UP mentor. Please have them email Genya Shimkin (upath@uw.edu), if they are not completing their III with RUOP or GHIP to ensure it meets the Underserved Pathway project criteria.

Continue the discussion from winter quarter about preceptorships and clinical experiences. Remind students to explore community service or service learning opportunities because they need to complete 24 hours of community service over 4 years of medical school as part of the Underserved Pathway. Students also need to complete 2 credits of non-clinical selectives and students may want to discuss possible options. Please remind students to complete at least 3-4 UP online modules per year of medical school and consider some guidance in this realm. For example, prior to a RUOP experience, a student may want to do the two rural medicine modules. Modules on motivational interviewing, health literacy, Medicaid and Medicare are all modules that give background information that can be used in all clinical settings. Feel free to take a peek at the modules and discuss one/some with your student. The modules are now open to the public and are found at [https://canvas.uw.edu/courses/1176574](https://canvas.uw.edu/courses/1176574).

Mentoring Second Year Students (most now in Clinical Clerkships)

Most of these students finished Foundations and their Consolidation and Transition (the time to study for and take Step 1 Boards and prepare for clerkships). Some may have delayed taking Boards and are still studying.

Things to talk about with your UP student:

- Interpretation of their Board Scores, especially because these scores need to be factored into career planning decisions. ([http://blog.firecracker.me/students/what-step-1-score-do-you-need-to-match](http://blog.firecracker.me/students/what-step-1-score-do-you-need-to-match))
- How is the transition to clinical training?
- Demands on their time and intellect
- Opportunities to practice skills: writing-up histories & physical exams, giving oral presentations
Students often enjoy discussion about how developing their clinical skill set, including basics such as hearing murmurs and learning more about the physical exam. They will benefit from discussing their interests and schedules with you. Please also continue to discuss your student’s progress in the Underserved Pathway. They can consider a goal to complete at least 5 of their 10 required modules before summer and remind them to look for ways to enhance learning with the modules. For example, have they seen situations with intimate partner violence, substance use disorder, incarceration, or issues with health literacy? There are modules on all of those! Feel free to take a peek at the modules and discuss one/some with your student. The modules are now open to the public and are found at https://canvas.uw.edu/courses/1176574.

Have they participated in any community service or service learning? Did they complete their Individual Investigative Inquiry (III)? If not, what are their plans for meeting this requirement? If you or they have questions about any of these requirements, please have them contact Genya Shimkin (upath@uw.edu).

**Mentoring Third Year Students (MS3)**

Things to talk about with your UP student:
- Year-end summary discussion
- Concerns about their clinical training
- Demands on their time and intellect
- Opportunities to practice skills:
  - Writing-up histories & physical exams
  - Giving an oral case presentation
- MS3 Curriculum: http://www.uwmedicine.org/education/md-program/current-students/curriculum/phase-2-patient-care

At this time, most third year students have completed 4-6 clerkship experiences. If your student has not completed 12 credits of clerkship with an underserved focus they need to choose elective clerkship experiences that meet this pathway requirement.

As they learn more clinical medicine, questions may arise around the health disparities that they see on their rotations and the types of care practiced in community versus academic settings. They may wonder about ways to care for the underserved in their future careers. This is fruitful material for conversation with your UP mentee.

Students are planning fourth year rotation schedules; this is a good time to discuss thoughts around residency.

**Mentoring Fourth Year Students (MS4)**

Things to talk about with your UP student:
- Wrapping up medical school
- Moving on and staying in touch!

Your fourth year student knows where they are going next year: residency match, expanding to do research or another endeavor. Consider an email or phone call to check in and see where their plan is for next year!

**UP Student Requirements to Earn a Certificate:**
- Minimum of 10 (E15 and up) or 8 (E14 and before) online curriculum modules or associated activities
  - Module: Who Are the Underserved? is **required** for all UP students.
  - Attendance at 1-2 UP event/gatherings per year is encouraged.
- One meeting per quarter (4/year) with Underserved Pathway/TRUST mentor (skype/phone, email, in-person).
- 2 credits of non-clinical selectives focusing on underserved populations or issues.
• Undeserved Community Experience: RUOP, GHIP, PCP, and/or preclinical preceptorship in underserved setting.
• Scholarly Project: Focus on an issue affecting underserved population(s). A III completed on RUOP or GHIP automatically qualifies.
• 12 credits (6 weeks) clinical courses in underserved setting or serving vulnerable population(s).
• 24 hours of community service, service learning, advocacy, or engagement in an underserved setting.

The Underserved Pathway Team (Contact list):

Kim Kardonsky, MD
Underserved Pathway Director
kardok2@uw.edu

Lynn Oliver, MD
Underserved Pathway Faculty Advisor
oliverl@uw.edu

Sharon Dobie, MD, MCP
