

The WA Portal is a tested solution for training and collaboration events geared to WA providers

Use case: The Practice Transformation Hub

- 455 In-person participants in several trainings
- 47 Agencies participating from across the state

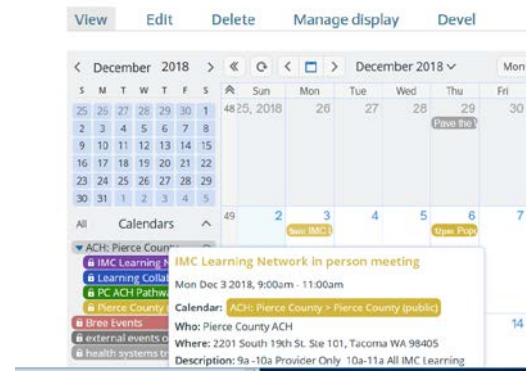

"Being able to host all documents and slides in one place saved me from sending individual emails before and after the event."

–Hub trainer

Your own partner calendar on the WA Portal will keep events organized

- Available within the virtual collaboration environment for ease of use by participants
- Links to Eventbrite registration pages for registration management

Pierce County ACH Calendar

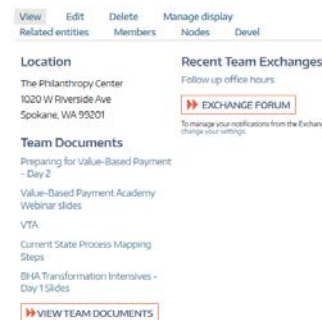

"We had 90 participants from 30 organizations. I sent WA Portal instructions for signing up - not a single person contacted me for help registering on My Portal or joining the Training Team!"

Registration and joining a Training Team is easy

The Training Team virtual collaboration area provides a secure environment to carry out webinars as well as host documents, slides, and links eliminating the need to send email with attachments – moving communication to one page (no broken email threads)

BHA Transformation Intensives

The Exchange Forum gives presenters and attendees a place to communicate asynchronously. And allows participants to follow up with presenters who may not be associated with hosting organizations

Follow up office hours

We have scheduled follow up office hours for Thursday July 26 from 12-1pm. This is an opportunity to reconnect with the Day 1 presenters and ask any questions you may have.

It's easy to duplicate! All materials live on the WA Portal and can be copied to a new Training Team

"Organizers don't have to search through archived files to find the material when a training is presented again."
