UW Global Cardiovascular Program Strategy Framework

point **b**

Key Priorities Year 1 through 3

VISION

A world where individuals can achieve optimal cardiovascular health

MISSION

We drive improved outcomes in cardiovascular health globally through interdisciplinary research and education, and equitable partnerships based on collaboration and mutual respect.

EQUITY AND JUSTICE INNOVATION
COLLABORATION

VALUES
EXCELLENCE
IMPACT

WHAT

Build top-notch and interdisciplinary research program

LEVERS

Intersection of CVD and infectious diseases

Hypertension

EMERGING FOCUS AREAS

Prioritize coinvestigation
and
reciprocal
innovation

Health Systems research

Expand UW Education Programs

Build faculty pipeline

External collaborations with Partner Institutions

Grow Global Fellows Program

Provide training and capacity building opportunities

Data science, mixed methods, stats training Grant writing, developing research as coinvestigators

Create opportunities for peer-topeer learning

Develop internal systems and capacity

Form Advisory Committee Path to new funding opportunities

Develop platforms to share research and thought leadership

Build infrastructure for collaborations

OUTCOMES

UW is a leading program for global CVD research

UW is an attractive home for new faculty and students of cardiovascular health

Partners build skills and capacity through UW partnerships

Recognized as a leading program for cardiovascular research
