

# IMPLEMENTATION SCIENCE IN GLOBAL HEALTH

***ARE YOU INTERESTED IN CLOSING THE RESEARCH TO PRACTICE GAP IN GLOBAL HEALTH?***

## Apply now for our short course on the **Fundamentals of Implementation Science in Global Health**

**August 22 – August 26, 2022**  
*University of Washington, Seattle, WA*

The Fundamentals of Implementation Science in Global Health is a one-week intensive course that provides course participants with an introduction to the emerging field of implementation science. This course outlines and explores an interdisciplinary framework of methods (including applied engineering, management tools, health systems, and policy research) applied to improving implementation and scale-up of health programs, paired with experiential case studies from global health leaders.

**INTENDED AUDIENCE:** This course will be of interest to researchers, policy makers, funders, and practitioners working in low- and middle-income settings who are interesting in an intensive introduction to implementation science.

**DEADLINE:** Course application deadline is **Friday, June 10, 2022**

**APPLY NOW:** Registration and course payment information can be found at:
