Equity, and Access
through Communication

STAYING CONNECTED THROUGH COMMUNICATION SURVEY

Purpose

The purpose of this survey study is to learn about the communication experiences of **family and friends of people with dementia**.

Your participation will help healthcare providers support people experiencing cognitive changes and the important people in their lives to stay connected through communication.

Each participant will receive \$25.

Participants

You may be eligible to participate in this survey study if you:

- Have a family member or friend who has been diagnosed with dementia
- Are in contact with this person at least two times per week

Details

- Participate from anywhere in the U.S.
- The study can be done online or over the phone
- Your participation should take 20–30 minutes
- For questions, contact speaclab@uw.edu or 206-221-3563
