

Comparing Lecanemab vs. Donanemab

Category	Lecanemab	Donanemab
Infusion Duration and Frequency	<p>Every 2 weeks for 18 months</p> <p>Infusion Dose #1 (1 hour infusion, ~3 hour observation)</p> <p>Infusion Dose #2-3 (1 hour infusion, ~2 hour observation)</p> <p>Infusion Dose #4-35 (1 hour infusion, ~30 mins observation)</p>	<p>Every 4 weeks for 18 months</p> <p>Infusion Dose # 1-4 (30 mins infusion, ~1 hour observation)</p> <p>Infusion Dose #5-18 (30 min infusion, ~30 mins observation)</p>
Imaging Frequency	Baseline + 4 MRI scans	Baseline + 4 MRI scans
Percent Slowing	27%	29%
ARIA Risk	Likely lower risk of ARIA	Potentially higher risk of ARIA
Geographic Considerations	Visits every 2 weeks	Visits every 4 weeks
Completion of Treatment	Option to transition to monthly maintenance dosing	End of Treatment at 18 months
