

ARE YOU INTERESTED IN HOW NUTRIENTS CAN AFFECT YOUR MEMORY?

Dr. Hanson at the University of Washington is enrolling people for a NIH funded study to test how two simple nutrients, sugar and fat, can affect your memory, brain (via MRI Scan) and blood biomarkers.

YOU MAY BE ELIGIBLE IF:

- You are age 55 or older
- You do not have Alzheimer's disease or dementia already
- You are not currently taking medication for diabetes

PARTICIPANTS WILL RECEIVE:

- Information about dementia prevention
- Participants will be compensated for their time.

WE NEED YOUR HELP TO ACCELERATE ALZHEIMER'S DISEASE RESEARCH!
