JOIN US IN OUR FIGHT TO HELP PREVENT DEMENTIA

MAP is a research study looking at whether metformin can help prevent memory decline for people with mild memory concerns.

You may be able to join if:
- you are 55-90 years old,
- you or your loved ones have noticed some changes in your memory, and
- you are not already being treated for diabetes or dementia

Potential benefits:
- You will receive some of your blood test results. We can also share these results with your healthcare provider.
- Your participation may improve the prevention of dementia for future generations.

For more information, visit cuimc.columbia.edu/mapstudy.

Taking part in MAP is voluntary and will not affect the care you receive. If you decide to join, you will be compensated for your time.
