Welcome to MyPlan
Your one-stop online academic planner

Create a Plan
Add courses and sections by entering a course code (such as CHEM 142), a course range (such as CHEM 1xx) or placeholder (such as VLPA, I&S, etc.), or use the Find Courses feature to look through the course catalog and current Time Schedule for classes. You can also add backup courses to your plan, or bookmark courses of interest for future use.

Audit Your Plan
Audit your entire plan, not just your current and completed courses. The Plan Audit is just like the DARS that you know, but includes your planned courses to help you see what effect your plan will have on your program requirements.

Build Your Schedule
Add scheduled courses to your plan, then view different options in a visual calendar in Schedule Builder. You can view up to three schedule options at a time, “pin” your favorite schedules for use later, and register for classes from Schedule Builder.

Register for Classes
MyPlan’s registration hand-off enables you to send your SLNs directly to the registration system from Schedule Builder. Choose the “View/Register” link from any of your pinned schedules, or from the displayed schedule options in your calendar, to view section details and begin the hand-off process. You can also register through the Registration box in your MyPlan sidebar.

What’s Next for MyPlan?
MyPlan continues to grow and evolve to meet all of your academic planning needs. Our next step is to allow potential transfer students from WA Community and Technical Colleges the ability to upload their unofficial transcripts to MyPlan. Additionally, we’ll be working on program sample plans. Advisers will create and publish plans that you can select to auto-fill your plan. No more adding courses one at a time for your program--add them all with the tap of a finger! Keep your eyes and ears open for more information on Sample Plans this spring.
