

Northwest Developmental Biology Meeting
March 14-17, 2012

Friday Harbor Laboratories - University of Washington

<http://depts.washington.edu/nwdb>

Abstracts due Feb 17

Whiteley lecturer

Billie Swalla - University of Washington
"A tale of notochord loss in ascidians"

Invited Speakers

Henk Roelink - University of California Berkeley
"Signaling in the absence of primary cilia and Ptch1"

Kristin Scott - University of California Berkeley
"Taste recognition in Drosophila"

Kurt Haas - University of British Columbia
"Direct in vivo imaging of developmental brain plasticity within the awake Xenopus laevis tadpole"

Siobhan Brady - University of California Davis
"Arabidopsis Root Spatiotemporal Gene Regulatory Networks"

David Ng - University of British Columbia
"Can Developmental Biologists Save the World?"

Organizers:

Olivia Bermingham-McDonogh
Jane Roskams
Douglas Allan
