COVID-19 Impacts
- COVID-19 impacts on travel demand and mode choice
- Transportation equity under pandemic impacts
- Solutions for safe transit use during pandemic time

Safety
- Pedestrian/bicyclist safety
- Rural road safety
- Multimodal issues

New Mobility
- Interactions with public transit
- Optimization of resources for social benefit
- Better data on active transportation/new mobility option demands and usage
- Curb space management

Accessibility
- Equity for all ages, abilities, and incomes
- Complete streets

Data
- Performance measurements
- New data sources and collection technologies
- Data mining and decision support methods and tools
- Data quality control algorithms

Performance
- Streamlining processes
- Scenario-based planning
- Improving environmental compliance
- Transportation funding options

Efficiency
- Congestion and delay relief

CAV
- Infrastructure needs: V2I communications and emerging communication technologies (such as 5G)
- Early adopters and near-future applications

Freight
- Improved data on freight movement and priorities
- Impacts of e-commerce
- International trade
