

Counting Goldfish

One day, while Carrie Crocodile and Alicia Alligator were playing house by the river, Carrie said, "Let's pretend it's time for a snack. We can use these little rocks and pretend they are Goldfish crackers. I'll count out 10 for you and 10 for me."

Alicia didn't know why Carrie had to be so picky and count out 10 exactly, because Alicia always ate just as many as she wanted. Alicia asked Carrie why she counted them so carefully.

Carrie replied, "I count them out so that I know exactly how many I eat, so that I can tell how much phe I get from them."

Let's help Carrie count out 10 crackers to eat for a snack!
