THE NINETEENTH ANNUAL

JOHN BUTLER LUNG CONFERENCE

A Tribute to Robb W. Glenny, MD

Recent Advances in Pulmonary and Critical Care Medicine

Friday, October 5, 2012

Boise Centre
850 Front Street
Boise, Idaho 83702

Presented by:
John Butler Lung Foundation
Saint Alphonsus Regional Medical Center
Saint Luke’s Health System

and

Co-Sponsored by
Ada Canyon Medical Education Consortium
Southwest Idaho Advanced Care Hospital

PROGRAM

8:00 am Introduction and Welcome
- Nola Darling, RRT
(President, John Butler Lung Foundation)

Moderator: Leonard D. Hudson, MD

8:15 am Special Leonard D. Hudson Lecture
Gas exchange in acute lung injury: Using physiology to guide treatment of hypoxemia
-Robb W. Glenny, MD

9:00 am Oxygen: What have we learned in the last 40 years?
-David J. Pierson, MD

9:45 - 10:15 am Break

Moderator: Marvin I. Schwarz, MD

10:15 am Utility of curbside consultation
-Richard K. Albert, MD

11:00 am Case Presentations - Session 1

Discussants: -Marvin I. Schwarz, MD
-Leonard D. Hudson, MD

12:00 Noon to 1:00 pm Lunch (on your own)

1:00 pm Announcements
- Nola Darling, RRT

Moderator: David Sasso, MD

1:15 pm Interesting chest radiology cases
-Sudhakar Pipavath, MD

2:00 pm Lung cancer: Hiding in plain sight
-Eric J. Stern, MD

2:45-3:15 Break

Moderator: Paula Carvalho, MD

3:15 Lies, damn lies, and observational studies in medicine
-Richard K. Albert, MD

4:00 pm Case Presentations – Session 2

Discussants: -David J. Pierson, MD
-S. Lakshminarayan, MD

5:00 pm Closing Remarks
-Nola Darling, RRT.

Guest Speakers

Richard K. Albert, MD
Professor of Medicine
University of Colorado Health Sciences
Director of Medicine
Denver Health Medical Center
Denver, Colorado

Robb W. Glenny, MD
Professor of Medicine, and of Physiology and Biophysics
Head, Division of Pulmonary and Critical Care Medicine
University of Washington
Seattle, Washington

David J. Pierson, MD
Professor Emeritus
Division of Pulmonary and Critical Care Medicine
University of Washington
Seattle, Washington

Sudhakar Pipavath, MD
Associate Professor of Medicine
Department of Radiology
University of Washington
Seattle, Washington

Erik J. Stern, MD
Professor of Radiology
Adjunct Professor, Department of Medicine, and Department of Education and Bioinformatics
University of Washington
Director of Thoracic Imaging
HARBORVIEW MEDICAL CENTER
Seattle, Washington
John Butler, MD  
(November 28, 1923- May 3, 1992)

Dr. John Butler was born and raised in the United Kingdom, and obtained his MB, ChB. in 1946 from the University of Birmingham. In 1958, he was awarded a Rockefeller Traveling Fellowship to the United States. In 1960, he joined Dr. Julius Comroe at the Cardiovascular Research Institute in San Francisco. In 1965, Dr. Butler was appointed Head of the Division of Respiratory Diseases at the University of Washington in Seattle, a position he held for the next 20 years. Under his leadership, the pulmonary division grew from one person to 28 full-time faculty members. He made numerous scientific contributions in the field of pulmonary and critical care medicine and in physiology. He trained many physicians and several of them now occupy prominent positions in the United States and several foreign countries.

This annual conference was founded to honor Dr. John Butler for his numerous contributions to pulmonary and critical care medicine.

The Leonard D. Hudson Lifetime Achievement Award

In 1985, Dr. Hudson became Head of the Division of Pulmonary and Critical Care Medicine at the University of Washington. He was a strong supporter of the pulmonary and critical care medicine program at the Boise VA Medical Center and helped initiating a pulmonary and critical care medicine fellowship training program in Boise, Idaho. Several graduates of this program are now practicing in Boise. The Leonard D. Hudson Lifetime Achievement Award was established in 2002 to recognize and honor Dr. Hudson for developing this important fellowship training program in Boise, Idaho. Several graduates of this program are now practicing in Boise.

Robb W. Glenny, MD

(Recipient of the Leonard D. Hudson Lifetime Achievement Award for 2012)

Dr. Glenny was born and raised in Minnesota. He has a bachelor’s degree in biomedical engineering and a master’s degree in computer science, both from Duke University in Durham, North Carolina. He graduated from the University of Virginia School of Medicine in Charlottesville and completed his residency training at Duke University. In 1989, he moved to Seattle for fellowship training in pulmonary and critical care medicine (PCCM) at the University of Washington (UW). In 1992, he became assistant professor of Medicine, and of Physiology and Biophysics. Dr. Glenny rapidly rose through academic ranks and, in 2003, was promoted to full professor. In 2005, he was appointed Head of the Division of PCCM at the UW. He has published in many prestigious journals, such as the Journal of Applied Physiology and Lancet. He was on the Editorial Board of Journal of Applied Physiology for many years and has also served as Associate Editor of this Journal. His research has been continuously funded by NIH grants. Dr. Glenny has served on several committees of the American Thoracic Society as well as the American Physiological Society, and has also chaired a few of these committees. He is the director of UW Medicine’s Lung Care and Lung Transplant Service Line, the only active lung transplantation program in the Pacific Northwest. On a personal note, Dr. Glenny was a talented soccer player in his younger days, and now he is an avid soccer fan who also coaches boys soccer at a competitive level. He enjoys traveling with his wife, Anne, and children, Elle, Colin, and Will.

We dedicate this symposium to Dr. Glenny for his numerous contributions to pulmonary and critical care medicine.
