

NUTRITION STRATEGIES FOR CHILDREN WITH SPECIAL NEEDS

Revised 1999/2001

This manual was developed to assist programs serving children with special health care needs to include nutrition as one of the provided services. The manual includes:

- Nutrition Screening forms in English and Spanish, as well as instructions on how to conduct screening and promote appropriate referrals.
- Food Guidelines for Children ages birth to 18 years, along with Feeding Skill Development.
- Eleven Sections on various Nutrition Concerns such as underweight, supplements, and constipation - including general information, nutrition strategies and parent handouts in English and Spanish.
- A discussion of nutrition issues associated with Down Syndrome, Cerebral Palsy and Children Prenatally Exposed to Drugs.

This manual is a revision and expansion of the 1991 edition. The revision was funded through grants from the Maternal and Child Health Bureau (#MCJ069345, #MCJ06933A).

Cost: \$40.00 plus \$5.00 for shipping (with binder)
or \$30.00 plus \$5.00 shipping (without binder).
