

## Sound Data Survey Website

**Title** Sound Data Survey Website

**Date** 01/27/2026

**Related Project** Sound Data Survey Website

**Status** Pending (Out to Client)

**Description** Goals of the website:

- To provide prospective survey respondents with: (a) Information about the survey, how to take it, how their responses will be used, data security, and why this research is important. (b) Increase the sense of trust and decrease the sense of risk prospective respondents feel in taking the survey. (c) Increase the sense of responsibility prospective respondents feel to take the survey.
- Share reports and results from collected data

### Planning

- Initial kickoff meeting with client to review any additional changes to scope, content or configuration requirements.
- Included are additional followup meetings to review additional client provided content and progress of site development.

**Planning Hours  
Minimum** 3

**Planning Hours  
Maximum** 4

**Planning Estimate  
Minimum** 465.00

**Planning Estimate  
Maximum** 620.00

### Setup

- Install MySQL database and CMS (WordPress) on development server.
- Install and configure required plugins, modules and base themes.
- Install licenses for paid plugins.
- Create roles and permissions and add user accounts to site.
- Prepare development site for content work.

**Setup Hours Minimum** 2

|                                     |   |
|-------------------------------------|---|
| <b>Setup Hours Maximum</b>          | 3   |
| <b>Setup Estimate Minimum</b>       | 310.00  |
| <b>Setup Estimate Maximum</b>       | 465.00  |
| <b>Design</b>                       | We don't expect to use a designer on this project as there is a limited budget and client has opted for UW Boundless theme as the basis for the design and layout of the site, which reduces cost.  |
| <b>Design Estimate Minimum</b>      | 0.00  |
| <b>Design Estimate Maximum</b>      | 0.00  |
| <b>Structuring</b>                  | <ul style="list-style-type: none"> <li>• Build out templates and content pages and custom layouts with PHP/HTML5.</li> <li>• Build navigation menus.</li> <li>• Build custom content/post types and views/displays for homepage and any other custom layouts.</li> <li>• Develop widgets and blocks for homepage and content pages (features, headers, footers and sidebar elements).</li> </ul>  |
