

3 октября 2013, 17:00-21:00

October 3, 2013 5pm-9pm

Museum of Flight (Murdock Theater)

9404 E. Marginal Way S., Seattle, I-5 Exit 158

ДЕНЬ АСТРОНОМИИ ASTRONOMY DAY

Конкурсы и развлечения для всей семьи. Выступления студентов программы для наследственных носителей русского языка STARTALK "Russian in the Sky and in Outer Space" и участников местных клубов астрономии. Посетители также смогут полюбоваться на чудеса ночного неба в планетарии музея. Вход бесплатный.

Special programs and family activities all looking up to the deep sky. Local astronomy clubs and STARTALK students will be at the Museum to share their knowledge of the heavens with viewing opportunities through their telescopes, and visitors can also marvel at the wonders of the night sky in the Museum's portable planetarium. Free.

STARTALK students' presentations (start around 6pm):

1. Yaroslava Cherkashina "Hazardous Space Objects for Life on Earth"
2. Margaryta Krutikova "History of Asteroid Impacts on Earth. Protecting the Earth from Asteroids."
3. Aleksey Bykovich "New City on Mars"
4. Ilie Moiseev "In Search of Planets Beyond the Solar System. Earth – 2"
5. Max Ignatyev "An Interstellar Spaceship for Space Travel"

Academic adviser: Marina Zamarashkina, PhD in Math/Physics, Scientific researcher of Institute of Applied Astronomy of Russian Academy of Science, St.Petersburg, Russia

Come and meet the STARTALK team under the SR-71. We will be happy to provide more information about the program and answer your questions. There also going to be children activities by the information table. For more information check: <https://depts.washington.edu/startalk/russianstudent.php>
