They are performing research between October 25th, 2017 and December 15th, 2017 to better understand goods delivery in highly developed urban settings in the 'Final 50 Feet'. This complex delivery step involves parking, building access, physical delivery, inventory sign-off and even payment, and all this must be performed in tight and crowded spaces and under demanding time constraints.

With your cooperation, UW and SDOT can use the information these students are gathering to improve delivery to buildings downtown and potentially traffic flow in the Capitol Hill and First Hill Neighborhoods.

If you have questions or concerns, please feel free to contact either of us for more information.

Thank you,

Christopher Eaves P.E.
Senior Civil Engineer
