ABA Boot Camp

Are you interested in learning more about Applied Behavior Analysis (ABA) and how you can use it to help children with autism spectrum disorder (ASD)? The UW Autism Center is excited to present a three-day workshop to prepare educators, providers, and parents to work effectively with young and elementary-aged children with autism using evidence-based strategies from principles of Applied Behavior Analysis (ABA).

Day 1: Introduction to ABA Workshop
• Learn how the characteristics of ASD impact learning
• Gain a basic understanding of ABA principles, including reinforcement, punishment, prompting, and teaching loops
*Participants may choose to attend only day 1.

Days 2 & 3: Hands-On Experience
• Opportunities for hands-on practice and live coaching/feedback with children will be provided
• Learn how to implement DTT and naturalistic ABA teaching approaches
• Discuss strategies for promoting communication and social interaction
• Learn how to collect and analyze data
• Review local resources related to ASD

Who should attend: Parents, educators, and providers working with children with ASD 8 years of age or younger who have little to no previous training in ABA

Content level: Beginner to intermediate

Clock hours: OSPI clock hours available for an additional fee
