

# Getting Started with ABA Intervention after an ASD Diagnosis

Become familiar with strategies and considerations that will help your newly diagnosed child with autism spectrum disorder (ASD) to develop essential skills. Learn where to start, elements of an effective teaching program, how to measure and track skill development, critical skills and patterns of behaviors that can be taught, and how to identify educational priorities based on your child's unique needs. Give yourself the tools to make informed decisions on your child's future!

## Course Objectives:

- Gain knowledge of the types of programs available and how you can help
- Gain knowledge of assessments to measure skills and determine educational priorities
- Identify important patterns of behavior that are essential for learning and development

**Who should attend:** Parents looking to help their newly diagnosed young children with ASD. Educators and providers are also welcome to attend.

**Content level:** Beginner

**Clock hours:** WA State clock hours available for an additional fee

**Instructor:** Scott Partington, MA, BCBA

## WHEN

Wednesday, May 6, 2020  
1:00 – 4:00 PM PT
