

# COVID-19 TELE-PSYCHOLOGY ASD DIAGNOSTIC CONSULTATION GROUP

During this unprecedented time of social distancing, psychologists at the UW Autism Center have been successfully utilizing tele-health diagnostic procedures with families in an effort to increase access to services. Our approach is informed by the Vanderbilt TELE-ASD-PEDS model. We seek to share our experiences and to hear from other practitioners who have tried or are interested in trying remote ASD diagnostics with children. Psychologists or other medical professionals with ASD diagnostic practices are welcome to attend.

## Consultation Group Objectives:

- Learn from attendees about best practices for ASD diagnostic evaluations for children
- Provide consultation support through weekly meetings with psychologists and other medical providers who regularly diagnose ASD
- Develop the capacity to utilize this model post-COVID-19 to serve remote communities

SPACE IS LIMITED

### WHEN

Every other Wednesday  
4:00-5:00 PM PT

### WHERE

Zoom Meeting

### COST

Free!

## COVID-19 TELE-PSYCHOLOGY ASD DIAGNOSTIC CONSULTATION GROUP

### What to expect:

During this unprecedented time of social distancing, psychologists at the UW Autism Center have been successfully utilizing tele-health diagnostic procedures with families in an effort to increase access to services. Our approach is informed by the Vanderbilt TELE-ASD-PEDS model. We seek to share our experiences and to hear from other practitioners who have tried or are interested in trying remote ASD diagnostics with children.

Psychologists or other medical professionals with ASD diagnostic practices are welcome to attend. Facilitated by Jessica Greenson, Ph.D., director of clinical services at the UW Autism Center (UWAC).

### Consultation Group Objectives:

- Learn about the innovative tele-health procedures now being used at UWAC for ASD diagnosis
- Share alternative strategies for remote diagnostic evaluations
- Discuss best practices for ASD diagnostic evaluations for children using tele-health.
- Provide consultation support
- Build a network of professional colleagues
- Develop our community capacity to utilize remote diagnosis post-COVID-19 to serve remote communities

**Who should attend:** Psychologists and medical providers whose typical practice includes ASD diagnostic work with children. Attendees need not have attempted tele-practice yet but need to be interested in learning and sharing ideas for this work. Discussions will focus heavily on children under 5. Adult diagnostic evaluations will be beyond the scope of this discussion.

**Content level:** Advanced
