

# Addressing Challenging Behaviors

Non-compliance, aggression, and eloping can get in the way of everyday activities from going out into the community to learning in school. Understanding how factors in our environment can increase or decrease challenging behaviors is important and will have an impact on how behaviors are addressed. Strategies presented are based on the scientific principles of ABA and will aim to create a responsive learning environment to prevent challenging behaviors from occurring. Please join us for this introductory workshop on addressing challenging behaviors.

## Course Objectives:

- To better understand challenging behaviors in individuals with autism spectrum disorder (ASD)
- Common motivations or functions of engaging in challenging behaviors
- How to identify and teach appropriate behavior to replace challenging behaviors
- Strategies to prevent challenging behaviors and how to manage them when they occur

**Who should attend:** Parents, providers, and educators interacting with individuals with challenging behaviors of all grade levels and who have little to no training in ABA

**Content level:** Beginner

**Clock hours:** WA State approved clock hours (6 hrs) available for an additional fee

## WHEN

Thursdays  
April 29 and May 6, 2021  
3:00 – 6:00 PM PDT

## WHERE

Webinar

## COST

\$125 per person  
\*10% discount for groups of 5 or more
