ABA LAUNCH Program

The University of Washington Autism Center’s ABA LAUNCH Program is a clinic-based, short-term, comprehensive and intensive early intervention program for children up to six years of age with a diagnosis of Autism Spectrum Disorder (ASD). This program offers an initial foundation of evidence-based, high-quality, Applied Behavior Analysis (ABA) services and parent education/support to families currently waiting to receive ongoing therapy services.

What is included in the program?
• 12 weeks ABA therapy sessions at our clinic; 4 days a week, 3 hours a day
• Multi-disciplinary team of psychologists, speech language pathologists (SLP), board certified behavior analysts (BCBA), and certified behavior technicians (CBT)
• 1:1 direct intervention w/ CBT
• 1:1 and group SLP sessions
• Weekly parent coaching sessions w/ BCBA
• Individualized transition planning sessions w/ psychologist and social work graduate students
• Weekly parent psychoeducation classes

What are the enrollment criteria?
• Children age 6 and under w/ formal diagnosis of ASD
• Order or prescription for ABA therapy from a provider from a recognized COE by HCA
• WA Apple Health Medicaid (Molina, Community Health Plan of WA, Coordinated Care, United Healthcare Community Plan, Provider One “Open Coupon”)
• Lives w/ in 30-minute radius from either our Seattle or Tacoma clinic
