

Academic and Organizational Success for Secondary Students

Hoping to start the school year off on the right foot with your student(s)? Not sure how to help your student(s) create organizational systems and academic strategies to set them up for success? During this live, interactive webinar, participants will learn how Autism Spectrum Disorder (ASD) impacts executive functioning and academic and organizational performance. Participants will have the opportunity to brainstorm how strategies presented can be effectively implemented with their student(s) as well as working in small groups to problem solve commonly occurring organizational challenges for secondary students.

Course Objectives:

- Increase understanding of how ASD impacts executive functioning ASD
- Learn strategies to support academic performance for secondary students
- Design organizational system to support secondary student(s)

Who should attend: Educators, parents, and providers

Content level: Beginner

Clock hours: 4 WA State approved clock hours

Instructor: Kathryn Holley, M.Ed., BCBA
