

2019 biomedical research integrity program

If I'm not safe, no body is: science, power, and activism in the age of #MeToo

NIH Topic: research misconduct

Sexual harassment is more prevalent in academic sciences, engineering, and medicine than in any other public sector, private sector, or government workplace (except for the military).

Participants in this session will:

- Learn about the findings and recommendations of the 2018 NASEM report Sexual Harassment of Women
- Explore the ways in which sexual harassment undermines the integrity of research
- Discuss how each member of the scientific community can and should contribute to positive culture change to eliminate sexual harassment and other types of bullying

Trigger warning: Content in this lecture may be upsetting or distressing.

Monday, July 22, 2019
T-439 Health Sciences Bldg

UW: 4:00-5:00 pm
Coffee 3:30-3:55 pm

(Fred Hutch: noon-1pm, Weintraub Bldg, Pelton Auditorium)

SPEAKER

Sharona Gordon, PhD

Dr. Gordon is professor of Physiology & Biophysics, UW School of Medicine. She is Editor-in-Chief of Journal of General Physiology, has significant local and international leadership experience, and has developed mentoring programs for early-career scientists. Dr. Gordon has contributed extensively to scholarship on the culture of academic science, women in science, and the relationship between science publishing and community activism. One of the many programs she has founded is Below the Waterline, a grassroots organization working to implement the recommendations of the NASEM report on Sexual Harassment.
