SCCA General Oncology Clinic Block Fact Sheet (For Fellows and Internal Medicine Residents)

Frequently Asked Questions:

- **What time do I need to be at the clinic?** You are expected to be on campus from 8:00am-5:00pm daily. Morning clinics run 8:00am – 12:00pm and afternoon clinics run 1:00pm – 5:00pm.
- **Who do I notify if I am unable to be in clinic?** Page the Attending you are scheduled to work with AND notify the GME Coordinator at (206) 606-1811. It is important you speak with someone—do not leave a voicemail.
- **Is there call?** Fellows take home call no more than 5 nights/month. This information is located in MedHub at: myHome>Schedules>SCCA-ONC. It is home call from 10pm-8am and consists of outpatient inquiries.
- **Where can I park?** It may be possible to get reduced parking through the transportation office located on the first floor of the Yale Building. However, space is very limited and there is frequently a waiting list. We recommend you utilize the shuttles between UWMC and SCCA as parking is very limited on campus. Otherwise, you can pay for street parking your first day of SCCA block rotation and arrange parking when you have time that day.

Clinic Expectations:

- Please abide by the SCCA dress code (no blue jeans, no perfume/fragrance, and no open-toe shoes).
- New patients will generally not appear on your schedule; however, you are expected to show up to the assigned Attending’s clinic to see and present any new and/or follow-up patients.
- Check the assigned Attending’s schedule for new patients and show up 30min prior to the appointment to see the patient. If you see a new patient that you have not received any medical records for, contact the scheduler and ask for records to be scanned to you.
- BCSC records are available the day before clinic at the MA Station on the 3rd floor of the SCCA. Please pick up the packet the day before clinic to prepare for your assigned new patients. Tracy Headley (Breast Scheduler) will send out emails a week or so in advance with your patient information. If you have any BCSC related questions, please contact her directly at (206) 606-2166. This is a multidisciplinary breast cancer clinic. You will be presenting the patient case at the formal lecture. **PLEASE NOTE: BCSC STARTS AT 11:00am** unlike most other clinics that start at 1:00pm.
- PCSC is a multidisciplinary pancreatic cancer clinic. You will also present the case at a formal lecture. Greta Valentin (PCSC RN) will provide you with more information at least a week before the clinic date.
- Please contact scheduling with patient and clinic related questions.
- If you have Continuity Clinic here, try to get the patients you see during SCCA Outpatient Oncology/Heme block onto your panel if possible.
