

WRAPSTAT

April Update

WrapStat

WFAS Pricing Structure

Starting September 1st, 2020 WERT is transitioning to a fee structure based on the **daily average number of youth in Wraparound** (see fee structure below). This change is needed to cover increased costs for staff, new software, server fees, etc. It also aims to make pricing more equitable across Wraparound programs of varying sizes.

When licensing a WFAS tool, under this new pricing structure, you will be given access to the **new WrapStat data system**. Our team will help set up an organizational configuration for you and give you the training and tools necessary to get started.

Thank you to our current licensees who provided feedback about these pricing changes back in February. For more information on pricing and licensing agreements, please check out our [Become a Collaborator](#) page.

Pricing Structure

Youth in Wraparound (Average Daily Census)	Annual Licensing Fee (per tool)
Under 100	\$1,000
100-200	\$2,000
201-400	\$3,000
401-600	\$4,000
601-1,000	\$5,000
1,001-1,500	\$8,000
1,501-2,000	\$12,000
2,001+	To be negotiated with the org/initiative

WrapStat Development

We are excited to announce that we are moving onto the next phase of development. WERT and the developers at 3Ci are developing our dashboard which will house snapshot graphs about youth information (e.g., youth enrolled, youth discharged) and wraparound services (e.g., mean fidelity scores, discharge outcomes). It will also show you information regarding current evaluation (i.e. response rate) cycles in your organization.

Additionally, our team has been experimenting with pulling samples and inputting data. We are looking forward to testing data analysis in the coming weeks.

WATCH OUR VIDEO

If you haven't yet, please [watch this 20-minute video](#) introducing WrapStat with Dr. Eric Bruns and Marianne Kellogg.

CHECK OUT OUR TOOLS

For those who have not reviewed the full range of Wraparound Fidelity Assessment System (WFAS) tools, [check them out here](#).

REACH OUT TO US

If you have any questions email us at wrapeval@uw.edu.

COMING NEXT...

Next month we will share updates to the system as well as a glimpse into how multi-tiered organizations can be configured in WrapStat.

Wraparound during COVID-19

WERT continues to provide technical assistance and training for our tools during this time. For more resources about implementing Wraparound during COVID-19, please go to the website of our parent organization, the [National Wraparound Initiative \(NWI\)](#).
